HEALTH WARNING

Read this before playing. A very small number of people can have a seizure when they see certain flashing lights or patterns, including those in video games. This can happen even to people with no history of seizures or epilepsy. If you, or anyone in your family, has ever had epilepsy or a seizure, talk to a doctor before playing.

Stop playing at once and see a doctor if you feel dizzy, see blurred or changed vision, have eye or muscle twitches, lose awareness, feel confused, or have any movement you can't control.

- Play in a well-lit room, a comfortable distance from the screen.
- Take a 10 to 15 minute break every hour.
- Don't play when you're tired, and rest sore hands, wrists or eyes.

ABOUT THIS BOOKLET

This booklet covers **Racing**, one of the modes in Overscale RC, as it is in **November 2026**. The game is still being built, so names, numbers and other details may change in later versions of the game and of this booklet.

Anything marked **IN PROGRESS** is planned, but not in the game yet.

Pictures of the tracks are the game's own track-select pictures. Character art, story scenes and the cover are art made for the game, not screenshots.

THE STORY

Win all five cups, take home a $500,000 bonus.

Anthony and Vincenzo Viento dreamed up a giant cross-country race. First, they have to prove the idea to their father, Ernesto Viento, who runs El Viento Heavy Industries. So they're starting small: RC cars, racing on tracks all over Connecticut, streamed live on VIM, Viento Influencer Media.

Anthony built every track. Vincenzo is streaming the whole thing. And when the invitations went out, all kinds of people turned up: streamers, a barista, a cable guy, a millionaire, and a few people who just wanted their own back.

Five cups, five tracks each. Every cup ends with a **boss race** against a rival who has a score to settle (page 46). Play it all in **Story Mode** (page 12).

Twenty-one drivers. Twenty-one cars. One bonus.

GETTING STARTED

TWO WAYS TO RACE

From the main menu choose **Racing**, then:

GRAND PRIX

Five cups of five tracks, points after every race, trophies for the top three (page 10).

ARCADE

Any track: a quick race, or a time trial against your own ghost (page 11).

THEN PICK

A **driver** (each tunes the car their own way), a **car** and its paint in the Garage, and a cup or a track. Press A to race.

MORE PLAYERS

Split screen: plug in up to four controllers. Each player presses a button to join.

LAN racing: race up to four PCs on your home network. One player hosts and everyone else joins. Internet play isn't available yet.

PAUSE AND SAVING

Press **Start** to pause. The game saves your best laps, ghosts, records and cup trophies for you.

FREE DEMO

The demo has the Initiate Cup and its five tracks, with Amelia, Chase, Tabitha and Noah. Everything else is in the full game: Early Access on Steam is planned by December 2026.

THE BASICS

RT to go, LB or RB to drift, X to boost, B to use your item, A to jump. Off the road or upside down? **Back** puts you back on the track.

AIMING ITEMS

Hold the left stick **down** as you use a Foam Dart to fire it behind you. Water Balloons and Gum Drops drop behind you; hold the stick **up** to throw them ahead.

Every control can be changed in Settings › Controls. This booklet shows the standard controller layout.

THE RACE SCREEN

1. **Lap**, race time, and your split against your best lap.
2. **Your item.** Here: a Shield, with its timer.
3. **Your place** in the race.
4. **Your driver**, reacting to the race.
5. **Moves** as you pull them off: drift, drift boost, hyper boost.
6. **Boost meter.** Drift, draft and land flips to fill it.
7. **Track map**, with every car on it.

Go the wrong way or miss a checkpoint and the screen tells you. Press **Back** to return to the last checkpoint.

HOW IT DRIVES

DRIFT TO BOOST

Hold LB or RB through a corner to powerslide. Drifting fills your **boost meter**, and the longer you hold the slide, the bigger the speed kick when you let go: three sizes of kick.

BOOST

X burns the meter for speed. Chain a drift kick, a boost pad and the boost button together for a **hyper boost**.

DRAFT

Tuck in right behind another car: you go faster and your meter fills. Then pull out and slingshot past.

JUMP, HOVER AND FLIP

A jumps; hold it in the air to **hover** on boost. Push the left stick up or down in the air to flip. Land a full flip and you get boost back for every turn.

WALLS, CEILINGS AND LOOPS

Some surfaces are **magnetic**: the car sticks to them, so you can ride walls, ceilings and loops. Slam toward a wall in mid-air to drive along it.

GRIND RAILS

Jump onto a rail and steer to keep your balance. Fall off and you lose the line.

DRIVER FEEL

Every driver tunes their car their own way: **control**, **drift**, **boost** and **speed**, from 1 to 10 (see their pages).

ITEMS

FOAM DART
Fires straight ahead and bounces off walls (up to 7 times). Spins out the car it hits. Hold the stick down to fire it behind you.

SHIELD
A bubble that blocks the next hit, for a while.

TOP OF DOOM
A spinning top that hunts down the car ahead of you (hold the stick down: the car behind).

DRONE ATTACK
A drone flies to the leader and knocks them into a spin. The fuller your boost meter, the longer.

TORNADO
A twister runs down the track ahead and throws up every car it meets.

WATER BALLOON
Dropped behind you, or thrown ahead. Bursts into a slippery puddle, or soaks a car directly.

GUM DROPS
Three trail behind you: they stop darts and balloons and gum up cars that hit them. Use again to throw or drop one.

BATTERY SURGE
A fresh battery: faster than boost for a few seconds, a full meter, and any car you touch gets zapped.

SEISMIC SLAM
Hop and slam: every car close around you spins out and is shoved away.

TRACK-SUS
A fedora and a gold glow: perfect handling, huge top speed, and cars you hit are knocked out. Rare.

ITEM BOXES
Drive through a "?" box to get an item, if you're not holding one.

LUCK OF THE DRAW

What you get depends on your place: the further back you are, the better the item. Leaders mostly get shields and darts.

Throw an item away with **down on the D-pad**. Toy weapons: cars get wrecked, nobody gets hurt.

GRAND PRIX

Five cups. Five tracks each. Every track used once.

The **Initiate**, **Aspirant**, **Contender**, **Champion** and **Elite** Cups each get harder than the last, and the whole field gets a little quicker cup by cup. Inside a cup, the easier tracks come first.

THE FIELD

Six cars: you and five others. Three are real rivals who race flat out; the other two are a step slower. **One rival is your nemesis**: they stay close to you and race you hardest, all cup long. The field, their cars and paints are picked when the cup starts and kept for all five races.

TROPHIES

Most points after five races wins the cup: **gold** for 1st, **silver** for 2nd, **bronze** for 3rd. Your best finish in every cup is saved.

PLACE	POINTS
1st	15
2nd	12
3rd	10
4th	9
5th	8
6th	7

Points after every race.

ARCADE

Any of the 25 tracks, any time.

RACE

A quick race against AI racers from a starting grid.

TIME TRIAL

Just you and the clock, with a **ghost** of your best lap to chase. Your records are saved. On the track select, LB switches between Race and Time trial.

SPLIT SCREEN AND LAN

Up to four players on one PC, or up to four PCs on your home network. One player hosts, everyone else joins, and AI racers fill the grid.

LAPS

Most tracks are three laps. **Elm City Spiral** is point to point: one run from the start to the finish. Miss a checkpoint and the game tells you you're going the wrong way.

STORY MODE

The whole race, told as a story.

From the main menu choose **Racing**, then **Story Mode**, and pick a driver. You'll see how the race began, then why your driver joined it.

FIVE CUPS, FIVE BOSSES

The five Grand Prix cups, in order. Finish a cup in the **top three** and its boss comes out: their scenes, then a race one on one at the cup's last track. Lose, and you can race them again.

YOUR STORY, SAVED

Every driver has their own story and their own ending. Your progress is saved for each driver: pick them again and choose **Continue**, or start a **New story**. Driver select shows how far each one has got.

You can skip any scene. The free demo has the opening, your driver's story and the Initiate Cup with its boss.

The little toy RC car Amelia had as a kid. Chase wanted her to buy a new hobby-grade car. She gave him her best pouty face, so he upgraded the Bee Mobile instead.

WHO IS AMELIA?

Amelia streams on VIM, Viento Influencer Media, as **ABeeWin**. Yes, that's her in the bee costume. She and her boyfriend Chase stream from the same apartment, one on each side of the wall. Her best friend Tabitha works at Summers Brew, their favorite coffee place.

WHY AMELIA RACES

VIM's email says she can race, and that she has to do it in the bee costume, because it's a VIM event. She rolls her eyes and goes with it. If she wins the $500,000 bonus, she wants to help out Summers Brew. She'd do anything to put a smile on Tabitha's face.

WHO IS CHASE?

WHY CHASE RACES

VIM's email offers a $500,000 bonus to whoever wins all five cups. Chase's ears perk up. His old friend Vincenzo runs VIM. Chase calls him with a message: bring your A-game.

SILENT KNIGHT

One of her dad's old model cars, turned into an RC car with Chase and Amelia's help. The body is cast iron, so it's heavy and tough. The motors came out of her sister Erica's professional hair dryer. Erica is not happy about that.

WHO IS TABITHA?

Tabitha works at Summers Brew. Her family doesn't own it. Winona White does. The name is a big coincidence. She is known for her dry humor. She also doesn't trust the Viento family one bit.

WHY TABITHA RACES

Amelia and Chase come into the shop and tell her about the race. Once they leave, Tabitha decides those two are going to get played by VIM. She could use the $500,000, and maybe share some with Winona. But mostly, someone has to keep an eye on Amelia and Chase.

BUNGLER

Noah took a model van from a display at his cable company and slapped the body on an old RC monster truck he found at a thrift store.

WHO IS NOAH?

Noah is Amelia's big brother. He's eight years older, and he fixes cable internet for a living. When they were kids, they watched cartoons together. Then Noah got to high school, got into paintball, and spent his time with his friends instead of his little sister. He still feels bad about it.

WHY NOAH RACES

He's fixing the internet at the RC hobby shop when he spots Amelia and Chase buying parts. Noah wants to win the $500,000 and give half of it to Amelia. It's his way of making up for the past, and starting fresh as family.

WHY ST. GERMAIN RACES

He has studied with masters, dueled with champions and raced chariots. He has tried humanity's best. Now there's a tiny car, a tiny remote and a whole state to race across. He wants to see if anything left in this world can still surprise him.

How to get him: That's a secret. Finding out how to get St. Germain into the race is up to you.

HINTS AND TIPS

- *Drift every corner you can. A full meter wins races.*
- *Hold the drift a little longer for a bigger kick, but don't hold it into a wall.*
- *Leading? Keep a shield or gum drops ready for what's coming from behind.*
- *A Drone Attack hits harder with a full boost meter. Save it.*
- *Stuck behind someone? Draft them, then slingshot past.*
- *Land your flips. Every full turn gives you boost back.*
- *Learn the high roads and the rails. They're often shorter.*
- *Watch your nemesis in a Grand Prix. They want your points.*

MADE WITH AI TOOLS

Overscale RC is made by one developer working with AI tools. Every song was written by the developer, based on chapters from his own books; he directed the instrumentation, and Suno performed the vocals and instruments. Logos were generated with ChatGPT and Qwen-Image. Driver portraits, story scenes, track thumbnails, menu art, concept art and some 3D models (such as Falcon Field's flying fortress and the driver characters) were generated with ChatGPT, then selected, edited and placed by the developer. The first twelve drivers' 3D cars were modelled with ChatGPT and Claude (Anthropic) from the developer's own concept designs; the newer drivers' cars were made with Tripo AI. Much of the game's code and level construction was written with Claude, under the developer's design and direction. Engine sounds were recorded from local cars. Other sounds and textures come from credited libraries or were made for the game. All game design, tracks, characters, cars and modes are the developer's own.
